Power Rating per Module: _____ DC watts

In addition to this form, you must submit the following:

- **Load Sheet**
- **One-line Schematic**
- **Site Plan showing relative position of meter/disconnect**

To provide reliable service to all WEC members, it is critical that the information being provided is accurate at the time it is provided. Omitted electric load information or increasing load without notifying WEC may result in damage to WEC equipment and additional cost at the member's expense should a subsequent transformer upgrade be necessary. Provision of completed load sheet does not provide any assurance of the right size transformer or a schedule to replace the existing transformer; WEC assigns transformers to members with completed load sheets when inventory is received by WEC.
